Electricity Reliability Across Region

Total Institutions by Type

Executive Insight: Significant disparities exist in digital education readiness across Ethiopian regions. Addis Ababa and selected urban-centered regions demonstrate comparatively stronger infrastructure readiness, while lower-performing regions continue to face overlapping constraints in internet access, electricity reliability, ICT infrastructure, and teacher digital preparedness. The analysis indicates that institutional readiness is strongly associated with infrastructure availability and regional stability conditions.

Recommendation: Priority interventions should target low-readiness and higher-risk regions through integrated digital education support packages. Recommended actions include strengthening electricity reliability, expanding internet connectivity, improving ICT laboratory access, scaling teacher digital skills programs, and increasing equitable student-device availability to support SDG-aligned digital learning outcomes.

SDG Alignment:

SDG 4: Quality Education
SDG 9: Industry, Innovation and Infrastructure
SDG 10: Reduced Inequalities

Urban vs Rural Infrastructure Gap

Infrastructure Analysis Insight:

Infrastructure readiness disparities remain visible across regions and institution types. The analysis shows that connectivity, electricity reliability, ICT lab coverage, and teacher readiness vary unevenly, with lower-performing regions facing compounded constraints. These gaps may reduce implementation readiness for digital education programmes and require targeted infrastructure and capacity-building support.

Intervention Priority Matrix

Priority Intervention Regions

Region	Score	Risk	Institutions	Readiness Level
Somali	40.87	Medium	477	Low
Afar	44.78	Medium	460	Low
Benishangul-Gumuz	48.35	Medium	353	Medium
Gambella	48.82	Medium	537	Medium
Tigray	50.25	Medium	664	Medium
Sidama	58.08	Medium	552	Medium
South Ethiopia	58.08	Medium	506	Medium
Amhara	58.37	Medium	643	Medium
Oromia	64.78	Medium	591	Medium
Addis Ababa	73.57	Medium	690	Medium

Strategic Recommendation:

Priority interventions should focus on lower-readiness regions with larger institutional burdens and elevated conflict exposure. Integrated support strategies should combine infrastructure strengthening, teacher digital capacity-building, connectivity expansion, and targeted resilience-oriented education investments.
